Subject: RE: Asking to Reschedule May 10 Meeting

Missy – thanks for checking so quickly. From our perspective, we really need to have the meeting sooner than June 1, so maybe we will not be able to have everyone attend. I will defer to Aaron on who from MDNR is essential to the conversation on management of stormwater at the site. We very much would like to have the meeting the week of the 16th or early the week of the 23rd if at all possible? Or does it help to move it earlier, to May 12 or 13?

Thank you,

Lynn M. Juett

Lynn – After reviewing everyone's calendar from DNR. It looks like the first available date will be the afternoon of June 1st. Please let me know if this will work on your end.

Thanks!

Subject: Asking to Reschedule May 10 Meeting

Hi Everyone – I apologize for this because I know how much effort Missy put into trying to get this meeting scheduled on the 10th, but the EPA folks would like to post pone this meeting by a week or so for several different reasons, but one of which is waiting on some validated sediment and maybe stormwater data to include in the conversation. So...would you look at the following week maybe for a meeting in Sedalia. One other suggestion I will toss out and that is we might want to also revisit where we are with the technical aspects of the IB. Maybe we can have ORD and USACE call in for that part of the discussion. So is there a day where we could maybe meet at 10:00 and plan to go through the afternoon (maybe break for lunch or have some brought in?)

Again – I apologize for the inconvenience. Lastly, if we wait another week we may have a chance of having Tom participate by phone - maybe.

Thank you,

Lynn M. Juett
